## Amendments to the Claims:

This listing of claims replaces all prior versions and listings of claims in the application:

## Listing of Claims:

- 1. (Previously Presented) A fuel cartridge comprising:
- a housing;
- a fuel egress port supported by the housing; and
- a heat producing element disposed in the fuel egress port.
- 2. (Withdrawn) The fuel cartridge of claim 1 further comprising:
- a surface area enhanced planar vaporization membrane at the heat producing element.
- (Withdrawn) The fuel cartridge of claim 2 wherein the surface area enhanced planar vaporization membrane is disposed about a substantial portion of the heat producing element.
- 4. (Withdrawn) The fuel cartridge of claim 2 wherein the surface area enhanced planar vaporization membrane is a composite membrane comprised of multiple layers or folds of polymer membrane to increase vapor permeation surface area.
- (Withdrawn) The fuel cartridge of claim 2 wherein the surface area enhanced planar vaporization membrane is a membrane arranged as a series of folds.
- 6. (Withdrawn) The fuel cartridge of claim 2 wherein the surface area enhanced planar vaporization membrane is a polymer membrane provided with macroscopically irregular and/or microscopically roughened membrane surfaces to increase the effective membrane surface area for pre-evaporation.

Applicant: Javit A. Drake et al. Attorney's Docket No.: 08935-0299001 / M-5033/Z-

Serial No.: 10/664,405 Filed: September 16, 2003

7. (Withdrawn) The fuel cartridge of claim 2 wherein the heating element is disposed within the housing adjacent the surface area enhanced planar vaporization membrane that spaces a liquid source of hydrogen containing compound or carbonaccous fuel from a vapor phase of the source of hydrogen containing compound or carbonaccous fuel.

- 8. (Original) The fuel cartridge of claim 1 wherein the cartridge supplies a source of fuel to a direct methanol fuel cell, and the fuel cartridge contains a liquid source of hydrogen containing compound or carbonaceous fuel.
- (Currently Amended) The fuel cartridge of claim 1 wherein the heating heat producing element is a wire disposed in thermal communication with the interior of the cartridge.
- 10. (Currently Amended) The fuel cartridge of claim 1 wherein the heating heat producing element is a wire disposed in the interior of the cartridge.
- 11. (Currently Amended) The fuel cartridge of claim 1 wherein the heating heat producing element in the interior of the eartridge and spaces a vapor portion of the cartridge from a liquid reservoir of the cartridge.
  - 12. (Previously Presented) A fuel cartridge, comprising:
  - a housing;
  - a fuel egress port supported by the housing configured to pass fuel in vapor phase;
  - a bladder for containing a source of fuel;
  - a heat producing element disposed in the fuel egress port; and
  - a piston that is urged against the bladder.

Claim 13 is canceled.

14. (Currently Amended) The fuel cartridge of claim ++ 12 further comprising a spring mechanism disposed to urge the piston against the bladder.

15. (Currently Amended) The fuel cartridge of claim 43 12 further comprising a battery cell disposed to supply power to the heat-producing element.

16. (Original) The fuel cartridge of claim 12 wherein fuel cartridge is a prismatic shaped cartridge.

17. (Original) The fuel cartridge of claim 12 wherein the source of fuel in the bladder is methanol.

18. (Withdrawn) A fuel cartridge, comprising:

a housing;

a fuel egress port supported by the housing; and

a piston that is urged against the vaporization membrane, with the vaporization membrane providing a chamber in the fuel cartridge in vapor communication with the fuel cell anode.

19. (Withdrawn) The fuel cartridge of claim 18 further comprising a spring mechanism disposed to urge the piston against the membrane.

20. (Withdrawn) A fuel cartridge, comprising:

an inner housing having a opening to allow vapor to escape;

a vaporization membrane;

a piston that is urged against the vaporization membrane, with the vaporization membrane providing a chamber in the inner housing in vapor communication with the opening; and

an outer housing disposed around at least a portion of the inner housing, forming an outer chamber about the inner housing, with the outer chamber being in vapor communication with the chamber in the inner housing.

- 21. (Withdrawn) The fuel cartridge of claim 20 further comprising a vapor impermeable member disposed to terminate the outer chamber.
- 22. (Withdrawn) The fuel cartridge of claim 18 further comprising a spring mechanism disposed to urge the vapor impermeable member against a liquid fuel in the inner housing.
